recorded even if all functions are active.

4. Administration Screen

1) General Information

It shows daily hours of PC use in total and records of block.

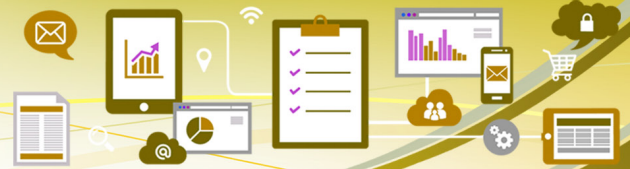

① Setting X-Keeper function

- It shows operating states of X-Keeper. You can choose a desired item and turn on/off.

② X-Keeper block records

- It shows the total hours of PC use and the records of currently blocked harmful websites, videos, and programs.

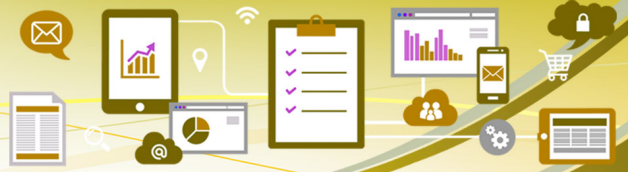

③ My page

- Change UserInformation
 - You can change name and e-mail address.
 - You can register your name of computer.
- Mobile remote control service Information
 - A text message with certification code will be sent to the mobile that was authorized for password.

※ WAP service is not available on free version.

[엑스키퍼 인증]
인증번호: 1111
엑스키퍼 WAP 서비스를 위한
인증번호를 입력하세요.

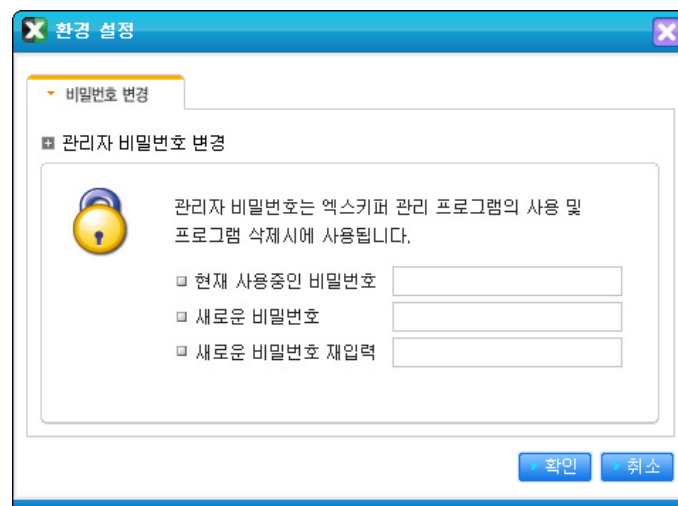

④ Updating

- You can check up-to-date version. If there is, you should update to latest files and program, Spam video DB and harmful website DB.

⑤ Password Change

- You can change the registered administrator password when installation.

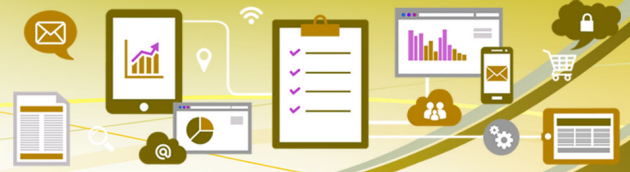

⑥ Viewing help

- You can use X-Keeper Help function.

⑦ Program Deletion

- You can delete the X-Keeper FREE Program.

2) Block Video

(1) Searching Videos

- Searching for Spam videos, harmful and suspicious files on users' computer.

① Setting video block

- You can decide if harmful videos are to be deleted when you block them.

② Setting search engine

- You can choose kinds of videos to search. Only designated videos will be searched.

③ Setting searching range

- You can choose drives in your computer to set a range of searching.

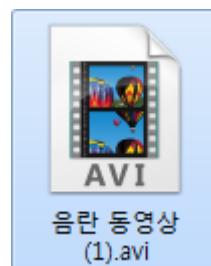

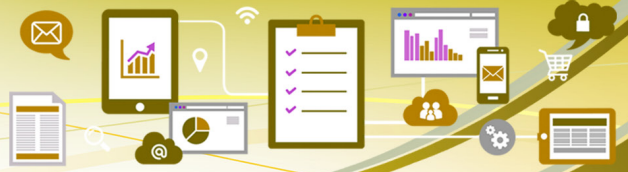

④ When the searching is completed, the results will be shown.

- Spam video files: confirmed as spam and pornographic video files
- Doubtful as harmful files: files containing words of harm
- Video transfer program: transferring programs of spam video by P2P, Web Disk, and Messenger

(2) Real-time video running

- The security pop-up window will appear and block any harmful video

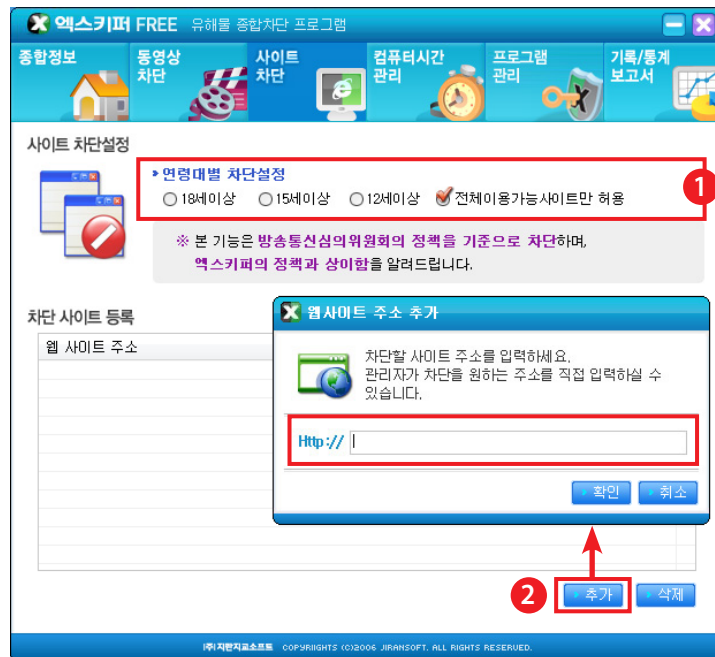

3) Website Block

- Set up a monitoring system to block websites
- Administrator can add desired websites for blocking.

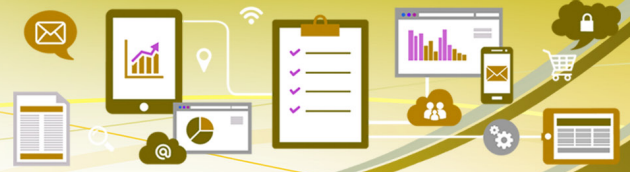

Ex) Parents can register websites and restrict children to access game websites.

- ① You can control access to games by ages.
- ② Administer can manually register desired websites for block.

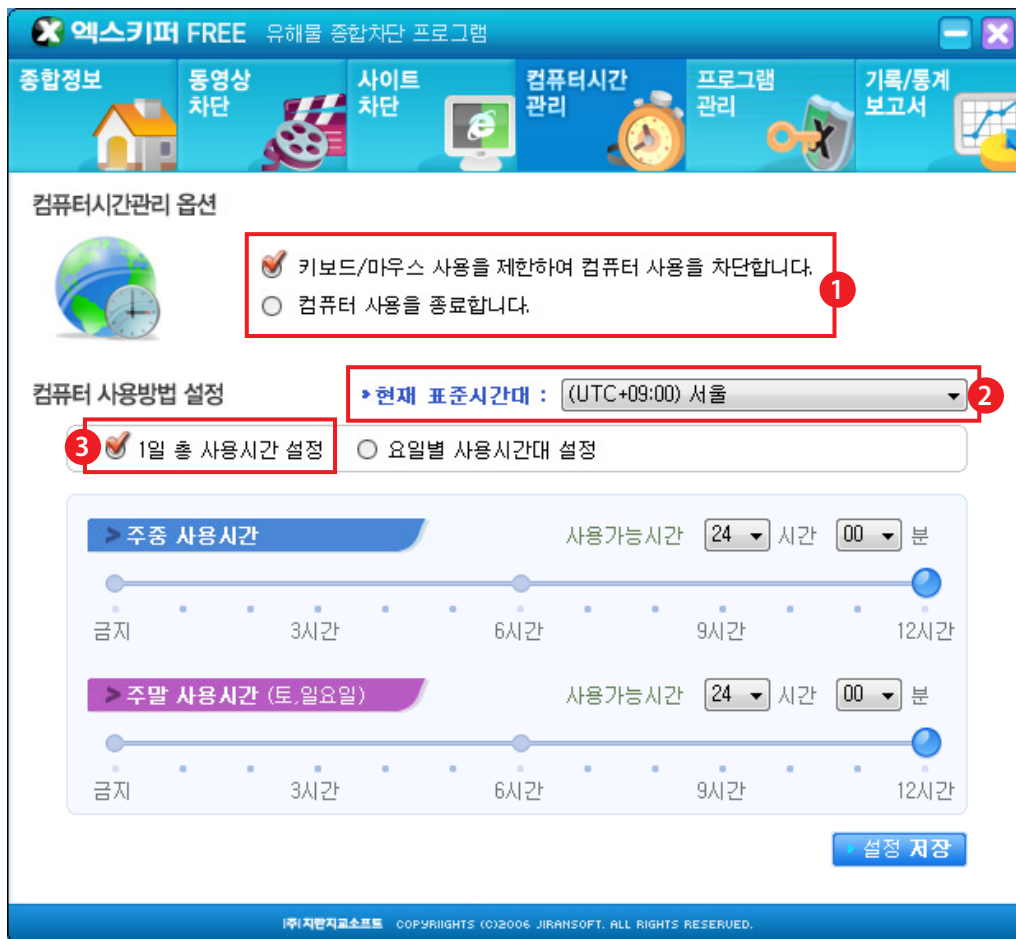

- ③ The access to harmful websites or registered websites by parents can be restricted.

4) Managing Hours of PC Use

- You can set the limit computer use.
- Parents can restrict availability of PC use by setting available hours of use.

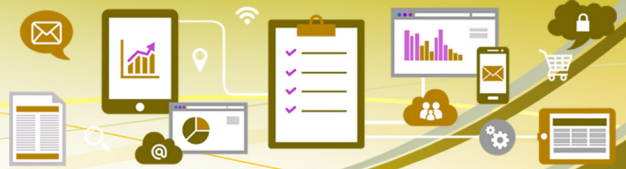

① Select Computer Hours Option

② GMT Option

- You can prevent purposely changing time by children by setting GMT according to user's residential area.

③ Setting daily hours of use

- Restrict to use computer when children spend all available hours.

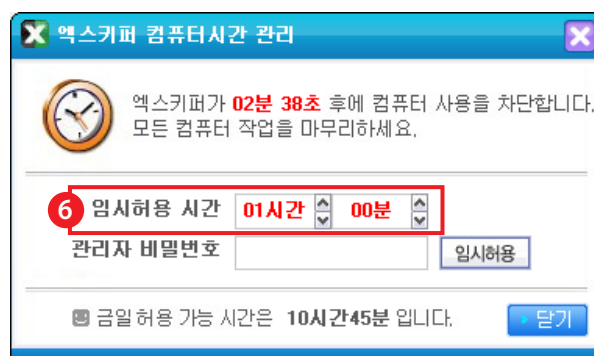

④ Setting available hours of use by days of the week

- click or drag desired hours for setting.

⑤ Save the setting

- Make sure to click "Save" to confirm the setting. Otherwise, this will not apply.

⑥ The alert window will appear 3 minutes prior to blocking. Parents can temporarily permit the use of computer longer.

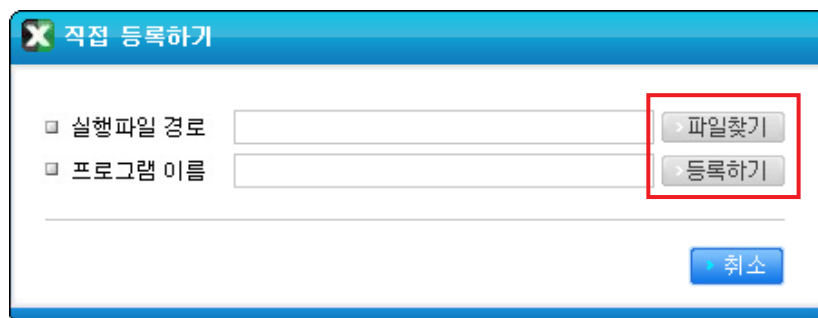

5) Program Administration

- Any harmful program can be blocked by using program monitoring functions.

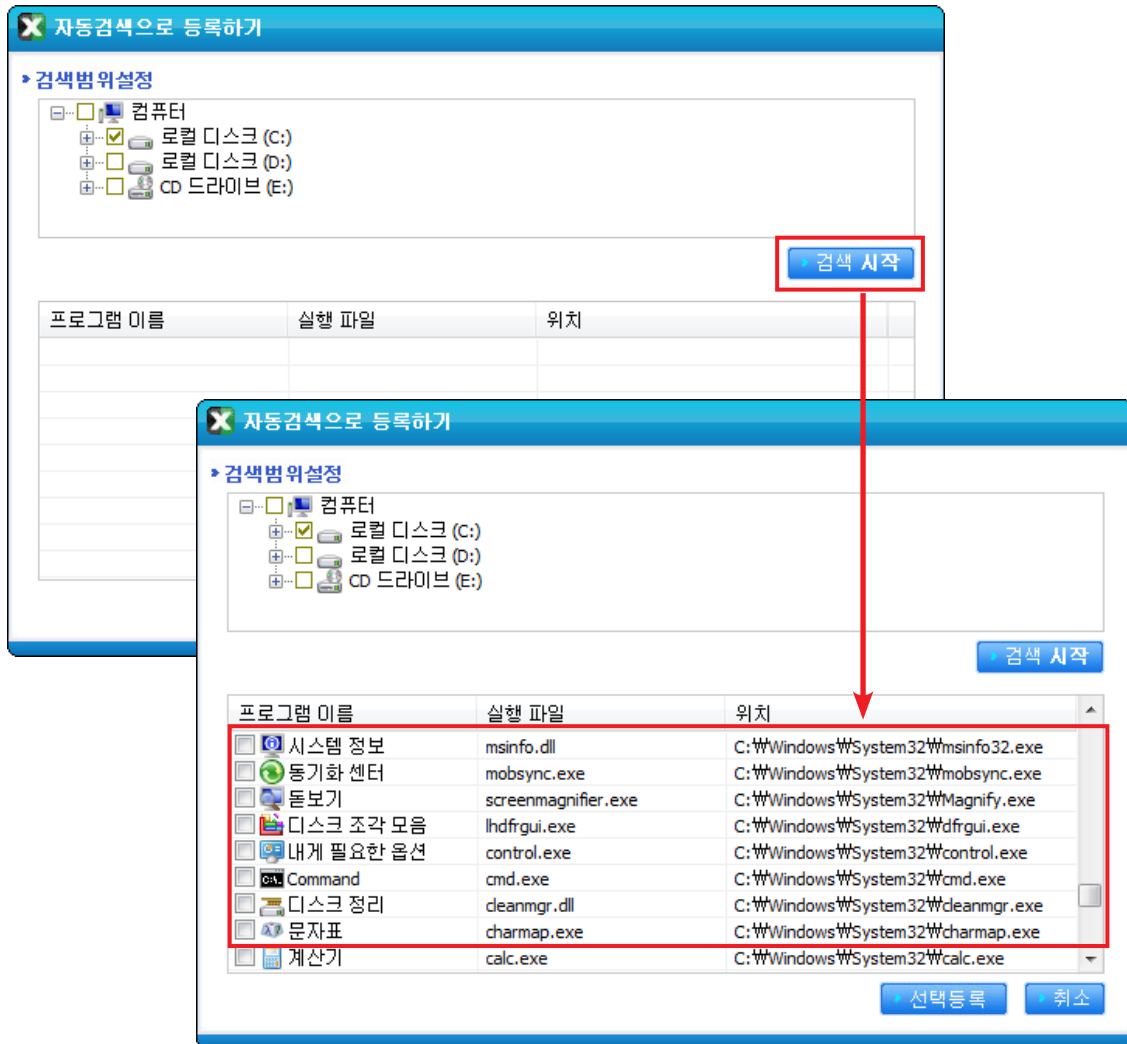

- Check for blocking P2P program
- Check for blocking messenger program
- Administer can directly register by selecting "Direct Register"

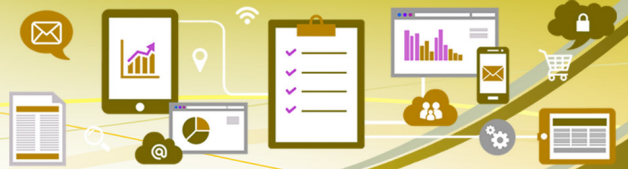

④ You can search and register desired program by selecting “register by automatic search”.

⑤ You can delete registered blocking programs.

6) Records/Statistics Report

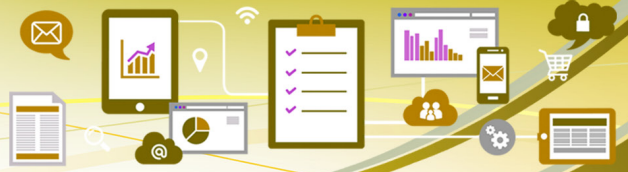

Master data report

You can check "numbers of blocked harmful video", "numbers of blocked harmful websites".
(For last month, this month, today)

Report of harmful videos

You can check the report of blocked harmful videos.
(For last month, this month, today, latest twomonths)
